Waxing Arms, Legs, Chest, & Back Bikini Waxing & Underarms

Week 18A & 18B

- Ears
- Face
- Cheeks
- Chin
- Neck
- Upper Lip

20.

21. Select Waxing Products – Hair Types & Characteristics

- **Hair Type**
  - ✓ Wavy
  - ✓ Straight
  - ✓ Curly
- **Shape of the Hair Follicle**
  - ✓ Texture
- **Size of the Hair Follicle**
  - ✓ Thickness

22. Prep Area for skin for Waxing Services

- ✓ **Degrease –** remove surface oil and bacteria

23. Prep Area for hair Waxing Services

- ✓ **Dry Brush –** loose hair form the skin surface
- ✓ **Skin Issues – Ingrown Hairs**
  - Extrafollicular – hair grows back into skin surface
  - Transfollicular – hair trapped under skin surface

24. Apply skin protectant product

- ✓ **Cornstarch powder – help absorb the oil and moisture on the skin surfaces**
- ✓ **Oil – create a film like layer on the skin surface**

25. Perform Waxing Skill Procedure

26. **Hard Wax Application Skill Procedure**

1) Load applicator with wax by dipping the applicator into the wax pot. You want to have the majority of your wax on the tip of the applicator. Use edge of the wax pot to scrape the excess wax from the back and sides of the applicator.

© 2019 Institute of Epidermal Cell Therapy and L. Saphonia Gee. All Rights Reserved.

2) Apply wax using the tip of the applicator. After applying wax turn applicator onto the side and use a figure 8 movement to spread wax evenly on the area to be waxed. This allows the wax to shrink wrap the hair.
3) Use the tip of the applicator to on the area that you have applied the wax to create a lip at the end of each strip. This allows you to have a tab to use when removing the wax.
4) Pull wax strip in the opposite direction of the hair growth pattern.
5) You will want to roll your wrist while pulling keeping as close to the skin as possible.
6) To help ease the discomfort for the client be sure to immediately cover the area waxed with your free hand.

27. Follow Post Waxing skill Procedure

28. Soft Wax application

1) Load applicator with wax by dipping the applicator into the wax pot. You want to have the majority of your wax on the tip of applicator not the back or dripping from the sides.
2) Apply wax at a 45 degree angle, slowly spreading wax while holding skin tight. You will want the wax to slowly roll off the applicator for a more even spread. Be sure that you apply wax in the same direction of the hair growth pattern.
3) Apply a pellon or muslin strip to the area to that you have just applied the strip of wax. To apply the strip you will use a sliding pressure in the same direction of the hair growth pattern.
4) Fold end of pellon or muslin strip to make a tab for pulling. Hold skin around area to waxed firm and tight. When removing strip you will want to pull in the direction opposite of the hair growth pattern. Be sure to roll the wrist as you remove the strip while staying as close to the skin as possible. To help ease the discomfort for the client be sure to immediately cover the area waxed with your free hand.
5) When using soft wax you do not apply the wax to the same area more than once. You may follow the procedure for hard wax removal to clean up the miscellaneous hairs that did not adhere to the strip

29. Follow Post Waxing skill Procedure

30. Serum Application

- Apply Ph. Balancer serum using massage movement
- Demonstrate –Tapotement Movement

31. **High Frequency (A/C)** using the glass electrode with neon gas. Gently gliding over the face. This creates a smoothing effect on the skin. Then use the sparking method over the area were sebaceous filaments are present
    - **Tips:**
    - Esthetician holds glass direct electrode.
