Body treatments and back treatments

© 2017 – 2108 Institute of Epidermal Cell Therapy and L. Saphonia Gee. All Rights Reserved.

- Throw disposable spatula in trash bag
- No Product should be applied in the eyes or mouth area
- Begin Spread at the Jawline: with exfoliating brush spread the product over entire face, nose, and above upper lip (except in eyes, nose, mouth)
- Using the exfoliating brush, move upward using circular movements beginning at the jaw (mandibular nerve)
- Use the dampened gauze with left hand to hold skin taut (so the brush does not drag on the skin. The brush should look like it's creating a gentle glide/ polishing effect on the skin) as you start on the right side of face. Keep the brush and dampened gauze close in distance creating tightening of the skin surface which prevents the brush from dragging on the face. Then complete on left side. **Exfoliate above upper lip and lower lip last using double bracing technique.**
- Place brush in Items to be disinfected bag.

3.4 Steam towel is applied and removed

- Remove steam towel from plastic bag. Discharge plastic bag in trash.
- **Remove excess water (wring out) from towel over trash bag.**
- **Test towel temperature on wrist**
- Place on the towel on face avoiding nose and mouth (they should be fully visible)
- Unfold the towel and slide towel off the lower face to the left or right (this not your product removal (remember it's steaming the face.)
