Biological Sketch

I've been interested in the science of beauty since before I can remember. I've conducted my own researches within skin care, as I struggled eight years with cystic acne. This developed into an interest of understanding how the skin on our bodies reacts to different products, leading into what we should and should not use when it comes to our beauty regimens. I've practiced facials on myself, family, and friends. I love the reactions from the results of my work on my "clients". It makes me feel good to help others feel beautiful in their own skin as I struggled doing so myself for a long time. I've recently taken a course which certified my practice in eyelash extensions. I am currently 6 months experienced in lashing multiple people/practicing on my mannequin. I'm happy with the progress I've made and am ready to take it to the next level. I am seeking to complete the basic esthetics course to retain an esthetician license and start a business of my own. My long-term goal is to eventually one day achieve a Master Esthetician license and branch from lashes onto proper facials, hydrotherapy, and all of the other amazing services I've received from other licensed estheticians.

Once I set my mind to something I'm determined to achieve it. I currently work at a restaurant in Great Bridge where I have worked my way up from a server to a position of authority. I strive to be the best at what I do by putting in the most effort I am capable of, I also enjoy passing my knowledge to those who seek it. I have trained every employee after me, I am efficient with communication and customer service. I enjoy helping people and making them happy, therefore I know this is the right career choice for me.

Thank you
