

Bones of the Head and Neck Project Guidelines

When preparing your project take the time to study the bones of the head and neck and understand each of its components. This will make your project a valuable tool in learning the mechanics of the bones and its function. It is suggested that you research the subject matter and not limit yourself to the information that is listed on the handout. You will be presenting your project and report to your classmates. Each project will be put on display and judged by your classmates for 1st, 2nd, and 3rd place. You will want to do your best. Best of luck and have fun!

- Please refer to the handout for a breakdown and explanation of the Different Bones of the head and neck that need to be included in your project.
- Please do not use any food items to prepare your project. We do not allow cooked items to share with the class nor do we allow dried food items to be used.
- Your project must have a written report to use for your presentation and an explanation of the bones of the head and neck. As well as their function.
- Your project and report are due on _____. Both must be completed and turned in on original due date in order to get credit.
