Enzymes & Herbal Exfoliators

Procedure

1. **Eye:** Apply eye pads or goggles and more exfoliate to the skin, until the skin is saturated.
2. **Sponge:** --You will need to have a sponge cut in half and dampened to hold skin taut as well as add moisture to skin.
3. **Brush Head:** -Using the large Goat Hair Brush dip the brush tips into water blot brush to remove excess water,
4. **Exfoliate & Brush:** -Apply exfoliate to tips of brush.
5. **Brush Machine:** -Insert brush into brush handle. Turn on brush machine making sure that brush is turning in counter clockwise direction. Adjust speed. For dryer skin, use slow, steady motion. Thicker, oily skin can tolerate a faster speed.
6. This procedure is a light polish using upward and outward movements.
7. **Neck:** - Begin movement using brush machine in counter clockwise circular movements on the right side of neck (cervical nerve) Use the dampened sponge with left hand to hold skin taut as you start on the right side of neck. Stay close to brush with sponge as you begin to move on neck
8. **Jaw:** - -Move upward using circular movements onto the jaw (mandibular nerve)
9. **Cheek:** - Continue to the cheeks (zygomatic nerve) using counter clockwise circular motions keeping sponge close to brush.
10. **Temple:** - Move up to temple (temporal nerve) still stretching skin with sponge.
11. **Forehead:** - Continue to forehead (supraorbital nerve) with same circular movements. Stop brush in the middle of forehead and remove brush from face. Detach large brush from handle.
12. **Brush Head:** - Dampen the bristles of small brush with water (squeeze out excess water.) Apply exfoliate to brush and insert into brush machine handle.
13. **Lip:** -Begin on right side (counter clockwise) under lip (mental nerve) move to middle of top lip (infraorbital nerve).
14. **Nose:** - Move to right side of nose (nasal nerve) with circular motions work on this side only
15. **Eye:** - Continue up to eye area (infraorbital nerve) working around beside right outer eye area.
16. **Brow:** - Continue movements with sponge up to brow (supraorbital nerve).
17. .Stop brush and repeat movements on left side of face
18. **Towel:** - Remove the exfoliation product with a warm towel following the Warm Towel Application and Removal skill.

Maintenance and Infection Control

- Detach brush from hand piece and wash with soap and water. Rinse and blot.
- Temporarily store in a dry ultraviolet sanitizer.
- When dry, transfer to a closed container.
- Dispose all disposable material.
- Clean brush head with warm soapy water. Immerse in hospital grade disinfectant for no longer than 20 minutes.
- Dry and place in dry sanitizer.
- Refill steamer.
- Clean steam machine with spray and disinfectant and use glass cleaner to clean mirror. Use clean cloth on glass because the paper towel and other paper products can damage the glass.
- Refer to OSHA and your state board
