

EYEBROW SHAPING

Pre-Procedure:

- Wash hands.
- Glove.
- Pre cleanse brows.
- Wipe with antiseptic solution.
- Use eye gel to lay down the brows.
- Brush the brows into place.
- Can use a white pencil to outline shape of brow you wish to create.

Procedures:

- Begin with the stray/wild hairs.
- Use your measurement for the inner, outer and arch point.
- Tweeze the stray/wild hairs first (get it as even as possible with the other side).
- Use your blade to complete the shaping; use the blade as a trimmer not a razor.
- Tweeze any left over hair.

Post-Procedure:

- Use witch hazel (soak in cool water onto a cotton ball).
- Use eye gel with antiseptic properties.
- Tissue off brow (blotting technique)
- Use an eye shadow or brow pencil to fill in any areas where the hair no longer grows, to enhance the thickness of the brow, or create a more defined arch.
