

SPRAY MACHINE

Benefits:

- Hydrates, tones, and freshens skin.
- Reduces the appearance of crease and laugh lines.

Indications:

- Dehydrated skin.
- After extractions for antiseptic properties.

Pre-Procedure:

- Client greeting and offer water.
- Have client fill out history intake form or follow up form.
- Escort client to changing area.
- Help client onto bed, cover hair and drape with towel.
- Client consultation.
- Sanitize and glove hands according to Gloving skill.
- Magnifying lamp (First look).
- Eye cleanse.
- Lip cleanse.
- Pre-cleanse (face).
- Magnifying lamp (First skin analysis).
- Basic cleanse.
- Second skin analysis (Wood's lamp).
- Exfoliation.
- Extractions.
- Mask.
- Place protective eyewear over clients' eyes.

Procedures:

- Attach hose to small bottle with spray nozzle. Bottle can be filled with toner or other treatment products.
- Have 2 extra towels for draping client chin/facial cap during procedure.
- Place towel under client's chin and around facial cap.
- Turn on power and adjust the intensity of the spray.
- Hold the spray approximately 12 -15 inches away from the face.

- Spray skin for several minutes to calm and hydrate.
- Turn off power.
- Gently blot the rest of the product on the client's skin.
- Re-drape client with dry chest towel if necessary.

Post Procedure:

- Remove gloves according to Degloving skill.

Maintenance:

- The filter may have to be changed periodically (where the hose is attached to the machine).
- Mineral build up in the nozzle of sprayer should be cleaned monthly or more often by soaking in alcohol and rinsing with warm water.
- Read and follow all manufacturer directions.

Infection Control:

- Follow sanitizing 8-n-1 skill.
- Refer to OSHA and your state board.
