

Skill**Benefits**

- Creates lasting color for approximately six weeks.
- Creates a natural looking shine.
- Eyebrow and eyelash color can be dyed to match if one is lighter or darker than another.
- Different shades may be used if client wants brows or lashes darker or lighter than the other.
- Quick simple procedure.

Indications

- People with makeup allergies.

Precautions of Use

- People with vegetable allergies
- Claustrophobic
- Use product for eyelash and eyebrow tinting only. Dye other than recommended, may cause eye and skin irritation, infection, and even blindness.
- Contact lenses and glasses must be removed.
-

Contraindications

- Infected acne condition
- Acne – Type 3 = May spread infection.
- Extremely sensitive skin.
- Herpes Simplex
- Diabetes
- Medications:
 - o Retin A
 - o Hydroquinone
 - o Accutane
 - o Blood thinners
 - o Oral or topical cortisone medications
 - o Antibiotics
- Chemotherapy/radiation treatments
- Inflamed or irritated skin
- Sensitive areas
- Cuts, abrasions, wounds, open sores.

Skill**Pre-Procedure**

1. Have client sign consent form.
2. Wash and glove hands.
3. Use small wax applicators for lashes, medium for brows (depending on size).
4. Determine color to use based on client's hair color, skin tone and eye color.
5. Mix color with correct amount of developer and let set. Color may be placed in refrigerator for faster developing.
6. Do patch test behind client's ear before procedure
If client is having a facial, tinting is done before mask application.
7. Have client lay on facial bed.

Lash Procedure

1. With cotton swab, spread a thin layer of petroleum jelly around the eye and place edges of dampened protective pad coated with petroleum jelly as close to bottom base of lower eyelashes as possible. Petroleum jelly acts as a barrier so that the dye does not stain the skin.
2. Apply tint to lashes with a small applicator. When tinting eyelashes, start with bottom lashes. Have client close eyes and advise them to keep them closed and apply tint to the top lashes. When tinting eyebrows, apply tint with and against the hair.
3. Remove any color that gets on the client's skin with cotton swab.
4. When lashes are saturated, allow the tint to set for recommended time, between 10-15 minutes.
5. Excess tint is removed with cotton swabs and/or cotton pads using warm water or make-up remover.
6. Use eyewash on cotton pad to remove all excess tinting color.

Brow Procedure

1. Brush brows with eyebrow brush.
2. Apply petroleum jelly around the brow and lightly over the eyebrow hair.
3. Apply color with a small applicator with the direction of the hair. Slide the applicator over the brow, loading color onto the hair.
4. Check color by wiping the brow with applicator. If not dark enough, reapply color and leave on longer, checking periodically.
5. Remove with gauze and tint remover (for brows only).

Post-Procedure

1. Apply an astringent.
2. Remove stray hairs with tweezers (follow tweezer guide).
3. Reapply astringent.
4. Remove gloves according to Degloving skill
5. Perming rods can now be attached to lash line
6. Roll lashes onto roller with small applicator implement
7. Apply perm solution, Remove
8. Apply setting solution, remove
9. Apply nourishing solution, remove
10. Remove roller for lash line with lash cleanser
11. Brush lashes upward

Skill**Maintenance and Infection Control**
