

CREAM MASK APPLICATION

Indications:

- Client's with sensitive skin.

Precautions:

- Let client know you are about to apply product to the skin before you begin applying, so as not to startle client.
- Immediately wipe away product if it gets in the clients eye or mouth.
- Apply mask appropriately for skin type and conditions.

MASK APPLICATION USING BRUSHES

Benefits:

- Spreading mask with brushes feels soothing to the client and ensures a faster and more even application.
- Spreading mask with brushes allows you to gather enough of the mask on the brushes without having to double dip. If you make enough mask, you can give the remainder to the client for home use.
- Use proper brushes and hold brushes flat against the skin so that application feels pleasant. There are several sizes of brushes so use the

- correct size for client's face and product use.
- Mask brushes may be synthetic or natural fibers.

Precautions:

- Use soft mask brushes designed for small surfaces.
- Let client know you are about to apply product to the skin before you begin, so as not to startle the client.
- Immediately wipe away product if it gets in the client's eyes or mouth.
