

FACIAL SKIN SCOPE (SECOND SKIN ANALYSIS)

Benefits:

- Allows client to see deeper layers of their skin, along with esthetician.
- Helps to determine skin conditions.
- Helps to determine the type of treatment to perform.

Indications:

- Needed for determining skin conditions.

Pre-Procedure:

- Client greeting and offer water.
- Have client fill out history intake form or follow up form.
- Escort client to changing area.
- Help client onto bed, cover hair and drape with towel.
- Client consultation.
- Sanitize and glove hands according to Gloving skill.
- Magnifying lamp (First look).
- Eye cleanse.
- Lip cleanse.
- Pre-cleanse (face).
- Magnifying lamp (First skin analysis).
- Basic cleanse.

Procedure:

- Turn scope switch to the “on” setting.
- Have client lean forward into the scope.
- Look into mirror. Having client turn head to right position, left position, look up and look down.
- To look for wrinkles, have client smile, frown, laugh and lift brow.

- Analyze client's skin to determine skin type and skin conditions:
 - ☐ White Fluorescence – Thick corneum layer.
 - ☐ White Spots - Horny layer of the skin and dead skin cells.
 - ☐ Blue-White - Normal and healthy skin.
 - ☐ Purple Fluorescence – Thin skin without enough moisture (dehydrated).
 - ☐ Light Violet – Dehydrated skin
 - ☐ Bright Fluorescence – Hydrated Skin
 - ☐ Yellow or Pink – Oily areas of the face and comedones
 - ☐ Brown – Pigmentation and dark spots
- Explain to client your findings based on skin conditions.

Post-Procedure:

- Turn scope switch to “off” setting.
- Charting and Client Consultation.
- Determine treatment to be used.
- Remove gloves according to Degloving skill.

Maintenance:

- Check all bulbs to make sure they are working and in place.
- Check updates from company for new programs.

Infection Control:

- Wipe down unit with disinfectant after each use.
- Refer to OSHA and your state board.
