Skill**Frequently Asked Questions**
Makeup**What formulation does foundation comes in?**

- Cream-to-powder foundation
- Liquid foundation
- Mineral foundation (powder)
- Stick foundation
- Tinted moisturizer

Should I use a brush to apply my foundation?

Absolutely, your fingers or sponge can add dirt and oil to the product. A sponge also retains the product. A clean brush can blend foundation evenly and uses less product. Areas that require more coverage can be patted on with a little foundation on a brush.

My face has a lot of red in it. What foundation would be appropriate for camouflaging my redness?

Use a foundation with more of a yellow base (warm color). Yellow helps to cancel out or minimize red tones.

How can I tell which shade or color is right for me?

Always stripe at least 3 different shades (Warm, cool and neutral) on the jaw line. The one that is the hardest to see and disappears fastest is the closest to your skin tone. Make sure to let it set

Closing Treatment-Procedure

1. Complete Makeup Assessment form
2. Recommend products for home use.
3. Complete Makeup Face Sheet
